PROJECTS

PulseAI — AI-Powered Fitness Web Application

04/2026 – Present

HTML,CSS,JavaScript

- Developed a modular SaaS fitness tracking platform using FastAPI and MySQL, enabling structured tracking of workouts, daily activity, and user progress.
- Implemented AI-assisted development workflows using Claude and Antigravity to streamline backend design and accelerate feature development.
- Designed a scalable architecture with well-defined APIs, normalized data models, and a mobile-first dashboard for real-time analytics and insights.

AI Push-Up Counter

09/2025 – 09/2025

Python, MediaPipe, OpenCV

- Built an AI-powered push-up counter using MediaPipe Pose Tracking for real-time human pose estimation via webcam.
- Implemented joint-angle computation logic to detect push-up states and automate repetition counting.
- Explored computer vision fundamentals including landmark detection and live frame processing for fitness tracking.
